

optiglass PC90 polycarbonate Cleaning Instructions

Cleaning and Handling instructions for Optiglass PC polycarbonate sheets are based on standard industry practices and guidelines. To ensure compatibility, always test a sample of the material with intended cleaner.

How to properly clean Optiglass:

- ❖ Wash sheet with lukewarm water and mild soap or detergent (see below for list of compatible cleaning agents)
- ❖ Gently wash the sheet with soft cloth or sponge to loosen dirt—do NOT scrub
- ❖ Rinse well with clean lukewarm water
- ❖ Dry thoroughly with a chamois or cellulose sponge to prevent water spotting
- ❖ Do NOT use squeegees, razors, or scrapers.
- ❖ Do NOT use abrasives or high alkaline cleaners.
- ❖ Do NOT use cleaners in direct sunlight or at elevated temperatures.

Compatible Cleaners and Detergents:

Joy ¹	Windex with Ammonia D ²	Palmolive ³
Mr Clean ¹	Naphtha (VM&P grade) Isopropyl alcohol	Formula 409 ⁴

How to remove masking adhesive, glazing compound, & grease:

Apply Naphtha VM&P grade, kerosene or isopropyl alcohol with clean, soft cloth. Wash immediately with warm water and rinse thoroughly with clean water.

Kerosene or VM&P naphtha, or isopropyl alcohol is effective in removing paint, marker ink, graffiti, labels and stickers. Rinse with warm water following use of these agents. Do not use in direct sunlight.

How to remove scratches:

Hairline scratches can be removed or minimized, generally, with mild automobile polish. It is recommended to test prior to use. Suggested products include Johnson Paste Wax, Mirror Glaze plastic polish, or Novus Plastics Polish #1 and #2.
